MOVE Series Contract

WHY WE DO IT - C Allen Design and The Dance Lab partner for the MOVE Series, utilizing art to celebrate wonderful little movers who are using imagination and movement to strengthen their minds and bodies. The importance of creative and physical activities cannot be overstressed as it relates to child development. So many positives stem from imagination and movement - fostering health, coordination, retention, balance, self-confidence, logical thinking, social comfort, and so much more. C Allen Design and The Dance Lab are ecstatic to bring this series to you and look forward to you helping us expand the series and continue to support other projects related to child development.

WHAT WE DO - The Dance Lab offers a half-hour, private creative movement session at The Dance Lab Moorestown, NJ location. Candace takes your child on a creative movement journey as a photographer (or two) capture the journey's essence. Within 24 hours of the photo session, photos are narrowed down to the top most expressive ones. The top photos are sent, via email, to the client who selects the final photo to be captured on canvas. Using acrylics and gouache media, Cassandra Allen captures the essence of the photo. Artwork focuses on the child's creative and physical energy so artwork can be a zoomed, cropped, less-detailed, texture-manipulated, or color variation of a photo; yet the painting is *strong* in likeness of the photo.

WHAT YOU GET - The most popular canvas sizes are 24" x 30" (\$350) and 30" x 40" (\$600) however Cassandra will work with different sized canvases, if requested. Each canvas is signed by the artist, and a series number is assigned, i.e. MS1, MS2, etc. Time permitting, each artwork is hung at The Dance Lab until picked up by client. Client gives The Dance Lab and C Allen Design permission to contact the client to request the artwork be included in exhibitions, however the client has the right to decline should such opportunity avail itself.
